## Here's what the artists have to say:

Lisa Mishra, "Besabar is an upbeat dance-pop song that I had so much fun making. I hope people enjoy listening to it as much as I enjoyed making it. I am also stoked to be the first few to collaborate with the Alexa team and super excited to see Alexa as the new millennial music destination."

**Gulraj Singh**, "I'm so happy to have 'Saathi' released as one of the first songs for 'Alexa Originals'. The song celebrates the true spirit of companionship and friendship, and I had a great time working on it with my lyricist friend Manoj Yadav. I'm always excited to create original music and have experimented with some exciting soundscapes and interesting musical arrangements for my instrumental track. I can't thank Amazon enough for this wonderful opportunity."

Vibha Saraf, "I am excited to feature my music on Alexa, where people are going to access my song by simply calling out its title. How much simpler could it get!"

**Diesby**, "Downtown is a Lover's love letter, the spark of first love & the beats will keep you moving. It is the perfect song to dedicate to your beloved. I have created the song with a blend of Modern Afro Dance, R&b, and a touch of urban Punjabi flavor. Playing around with flavors makes the music universe interesting and that's what I enjoy with my fellow producer Chapter6. Elevate your mood with my next single 'Downtown' exclusively on Amazon Alexa Originals."
